COMPANY PROFILE

WHO WE ARE

Our team of experts consists of accomplished senior analysts and retired military personnel. With a collective of over 100 years in the military, special service, intelligence services, counter terrorism, anti narcotics and personnel protection we offer comprehensive solutions based on long-standing expertise and a vast information reservoir.

Our team has the ability to mitigate threats through passive, technical and physical means and intelligence based early warning and security updates. Probyn security services include protection to industrial complexes, diplomatic personnel or locations, home security, offices or VVIP protection.

Probyn provides a holistic approach to ensure the safety of its clients.

THE PILLARS

Our Vision:

To be the leader in security solutions, by providing the full spectrum of security services from passive to physical to cyber. To be the very best in mitigating threats of all types to clients in the most efficient, adaptable and cost effective manner.

Security solutions:

We look at security as a comprehensive solution, integrating all the facets of security to create synergy and cost effectiveness.

Mission Statement:

Be the leading security provider in the market, with comprehensive, sophisticated and adaptable solutions for clients. Be the market leader in providing threat analysis, risk assessment and providing security of all types.

Our values:

Honesty, loyalty, adaptability and attention to detail.

Goals:

Establish an international presence that facilitates security and corporate assistance to new investors with particular emphasis on the region. To deploy our brand of integrated security to clients in the Middle East, Asia and Africa,

PROBYN ADVISORS

Probyn Advisors is focused on a unique holistic security solution that will provide analysis-based consultancy focusing on the strategic and tactical levels. We are experts in security audits to evaluate in-place security systems with clients, through rigorous checks and tests. We also carry out security risk assessments and provide updates on a weekly/monthly basis in order to keep clients abreast of new threats.

With risk assessment, organisations can meet compliance obligations and gain an understanding of their exposure to threats and vulnerabilities, Today's organisations need to adapt to new technology securely and cost-effectively while strengthening the infrastructure to defend against new threats. Our expertise is to help our clients to identify, quantify and prioritise risks introduced by emerging threats and vulnerabilities. Our risk assessment is not only customised to the clients environment, but also helps keep our clients one step ahead in today's volatile crime environment.

SERVICES:

1. Security Programme Reviews.
2. Risk Profiles, Reports.
3. Travel Advisory Services.
4. Security Training.
5. Crisis Planning and Disaster Mitigation.
6. Risk Assessments and Audits.

PROBYN **SECURITY ADVISORS**

With the growing need for turnkey solutions, security would be ineffective unless all the parameters of security are addressed. Making full use of our expertise in providing analysis based consultancy, Probyn Security Advisors focuses on physical security solutions.

SERVICES:

1. Premises Protection. (Homes/Banks/Malls and Offices)
2. Industrial Security.
3. Diplomatic and Foreign Missions Security.
4. Special Project Security Management.
5. Remote Site Management.

7. Emergency Notification and Evacuation Systems.
8. Road Blockers, Parking Barriers, Parking Management Systems.
9. Blast and Ballistics Proofing, Safe Havens, Jackets and Vests.
- 10 Cyber Security

PROBYN **SMART HOMES**

Incorporating the latest hi tech wireless equipment and military grade communication standards we aim to make your home not only safe but smart as well.

Your home will never be safer.

At Probyn, we specialise in reliable, wireless home security systems. Our systems are personalised and state-of-the-art, yet they are simple to use and easy to set up.

Unlike traditional alarm systems, our wireless home security and home automation systems do not use telephone lines to communicate. Instead, we use a mesh of military grade wifi, low-power radio signals, and stronger cellular networks in your area. This is done to ensure a strong signal at all times. In addition, any tampering with our wireless home security systems, including their sensors, will trigger an alarm response.

Our aim is to provide a comprehensive synergised solution towards home security with home automation. A solution that not only integrates burglar alarm systems and CCTV surveillance but goes a step further by integrating door locks, door bells, lighting, heating and cooling systems as well as entertainment systems.

Complete home control at your finger tips by use of your smart phones or by simply giving a voice command.

FEATURES

Keyless Automated Autonomous Door Locks and Gates
